Professional Summary

Results-driven professional with a Bachelor's degree in Mechanical Engineering and a strong technical background spanning software development and engineering. Experienced in troubleshooting, technical documentation, and providing field support in high-stakes environments. Adept at explaining complex technical concepts to diverse audiences and committed to supporting healthcare technology initiatives, as evidenced by award-winning medical device designs.

Technical Skills

Software & Systems: Android OS troubleshooting, web-based management portals, Microsoft Office Suite (Excel, Word, PowerPoint).

Programming & IT: Golang, Python, SQL, HTML, CSS, and network programming concepts.

Support & Documentation: Technical report writing, data analysis, process optimization, and system debugging.

Tools: Git, Docker, Redis, and CAD software (AutoCAD, SolidWorks, Autodesk Inventor).

Professional Experience

Asst. Site Engineer & Supervisor | TEY Projects Ltd. | *April 2025 – October 2025*

- Provided technical drawing reviews and on-site supervision for a major residential estate project.
- Coordinated material logistics and submitted daily progress reports to the Project Manager.
- Enforced strict compliance with design specifications and safety standards (HSE).

Co-Founder & General Manager | 530 Nig. Ltd. | *2022 – 2024*

- Oversaw technical and operational units, streamlining workflows and enhancing team execution.
- Increased revenue by over $15,000 in 2023 through process optimization and performance management.
- Managed regulatory compliance and documentation for all company operations.

Freelance Design/CAD Engineer | *2015 – Present*

- Developed end-to-end technical solutions and documentation for industrial and medical sectors.
- Collaborated with clients to redesign and optimize mechanical systems for improved functionality.

Healthcare Technology Projects

Swabon - Handheld Self-Testing Device (2020): Collaborated on the design of a microchip-based diagnostic device for rapid testing of COVID-19, Malaria, and Pregnancy.

3D-Printable Medical Ventilator (2020): Led the design team to create a low-cost ventilator during the MIT COVID-19 Hackathon, winning 1st place in Manufacturing.

Technical Instruction & Volunteering

CAD Instructor & Teacher | *Various Locations* | **2011 – 2022**

Technical Mentorship: Provided hands-on volunteer training in AutoCAD and SolidWorks to students and lecturers at Modibbo Adama University (2015–2020) and Federal Polytechnic Mubi (2011–2013).

Curriculum Delivery: Developed training materials and led practical workshops in Abuja to simplify complex mechanical design and software concepts for diverse learners.

Problem-Solving Support: Assisted participants in troubleshooting software installation and design errors, fostering a strong technical foundation for beginners.

Education & Certifications

B.Sc. Mechanical Engineering Technology | Modibbo Adama University, Yola (2024)

PCEP – Certified Entry-Level Python Programmer | Cisco Networking Academy (2025)

Introduction to COVID-19: Methods for Detection, Prevention, Response and Control | World Health Organization (2021)

Recognizing and Managing Anaphylaxis | World Health Organization (2021)

Entrepreneurship Development Training | SMEDAN, Yola (2020)

Key Strengths

Analytical Problem Solver: Strong critical thinking skills used to solve complex engineering and operational challenges.

Effective Communicator: Excellent verbal and written skills, with experience in cross-departmental coordination.

Adaptable & Mobile: Proven ability to thrive under pressure and adapt to new and technologies quickly.

Collaborative: Experienced in working within multi-disciplinary teams to achieve project objectives.
